KS measures homeless status on all enrolled persons and collects monthly living situation status updates on children in targeted case management or community psychiatric supportive treatment and adults with serious and persistent mental illness that are in community support services. The total number of people served through the KS PATH Grant (age and gender not available) reflect the total number served through the grants during FY03.

US totals based on states reporting.

State Notes:

- 15 These data are collected monthly and reported on a quarterly basis through the Children's Client Status Report (CSR) and the Adult Client Status Report (CSR). The target populations (the populations on which KS collect monthly data and generates quarterly CSRs are children with SED that receive targeted case management or community psychiatric supportive treatment and adults with SPMI that are enrolled in Community Support Services, which is an array of services that includes targeted case management, community psychiatric supportive treatment, mental health attendant care, individual community support, and psychosocial treatment group. The data in this table reflect the living statuses of children and adults in the targeted reporting population in June '03. Kansas has the data to report gender and race, but we did not have the human resources to generate the reports in this detail for the FY03 Implementation Report. We will be able to report race and gender for the FY04 Implementation Report - we are currently working on the programming for these reports.

Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 15.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

These data are collected monthly and reported on a quarterly basis through the Children's Client Status Report (CSR) and the Adult Client Status Report (CSR). The target populations (the populations on which KS collect monthly data and generates quarterly CSRs are children with SED that receive targeted case management or community psychiatric supportive treatment and adults with SPMI that are enrolled in Community Support Services, which is an array of services that includes targeted case management, community psychiatric supportive treatment, mental health attendant care, individual community support, and psychosocial treatment group. The data in this table reflect the living statuses of children and adults in the targeted reporting population in June '03. Kansas has the data to report gender and race, but we did not have the human resources to generate the reports in this detail for the FY03 Implementation Report. We will be able to report race and gender for the FY04 Implementation Report - we are currently working on the programming for these reports.
